### Feedback 43 of 45

What is one responsibility of Product Management?

- Provide estimates for the Team Backlog
- Maintain the Architectural Runway
- Own Spike Stories on the Team Backlog
- Define priorities in the ART Backlog

1 out of 1

### Feedback 44 of 45

What is one way to address substantial rework?

- Reprioritize the work
- Regularly engage with the Customer and Business Owner
- Gather all requirements prior to starting the work
- Shift reviews right

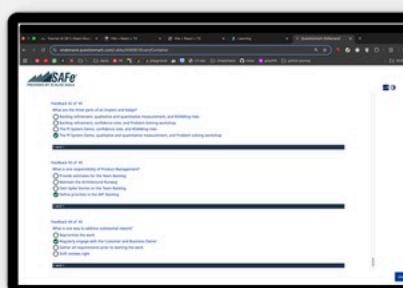

1 out of 1

### Feedback 45 of 45

Which of the following roles is responsible for prioritizing the Agile Team Backlog?

- Release Train Engineer
- Release Manager
- Product Owner
- Scrum Master/Team Coach

1 out of 1

Close ✕

### Feedback 42 of 45

What are the three parts of an Inspect and Adapt?

- Backlog refinement, qualitative and quantitative measurement, and ROAMing risks
- Backlog refinement, confidence vote, and Problem-Solving workshop
- The PI System Demo, confidence vote, and ROAMing risks
- The PI System Demo, qualitative and quantitative measurement, and Problem-solving workshop

### Feedback 39 of 45

What is one benefit of Design Thinking?

- The Solution is accountable
- The Solution is actionable
- The Solution is sustainable
- The Solution is reliable

1 out of 1

### Feedback 40 of 45

Which of the following statements describes the Product Owner role?

- Representing the Customer to the Agile Team
- Ensuring quality by testing the Solution
- Prioritizing the ART Backlog
- Estimating Stories in the Product Backlog

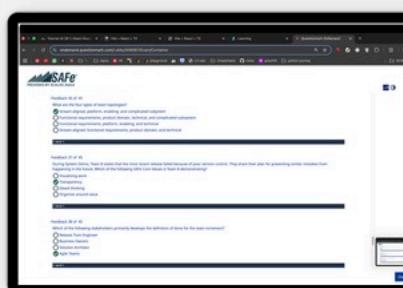

1 out of 1

### Feedback 41 of 45

Which of the following statements is true about Roadmaps?

- Roadmaps provide a single planning horizon
- Roadmaps are only adjusted at PI boundaries
- Roadmaps are commitment
- Roadmaps communicate intent

Close ✕

### Feedback 36 of 45

What are the four types of team topologies?

- Stream-aligned, platform, enabling, and complicated subsystem
- Functional requirements, product domain, technical, and complicated subsystem
- Functional requirements, platform, enabling, and technical
- Stream-aligned, functional requirements, product domain, and technical

1 out of 1

### Feedback 37 of 45

During System Demo, Team B states that the most recent release failed because of poor version control. They share their plan for preventing similar mistakes from happening in the future. Which of the following SAFe Core Values is Team B demonstrating?

- Visualizing work
- Transparency
- Siloed thinking
- Organize around value

1 out of 1

### Feedback 38 of 45

Which of the following stakeholders primarily develops the definition of done for the team increment?

- Release Train Engineer
- Business Owners
- Solution Architect
- Agile Teams

1 out of 1

### Feedback 33 of 45

Which of the following design-thinking techniques helps breakdown Features while considering the end-to-end user flow?

- Gemba walks
- Personas
- Story mapping
- Market research

1 out of 1

### Feedback 34 of 45

During which PI Planning activity do team members commit to do everything they can to meet the agreed-to objectives?

- The PI confidence vote
- The draft plan review
- The Management Review and Problem-Solving workshop
- The second team breakout session

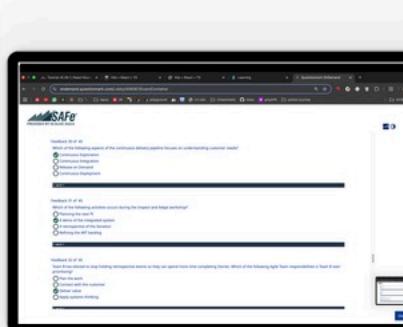

1 out of 1

### Feedback 35 of 45

Which of the following is both a SAFe Lean-Agile Principle and a Lean-Thinking principle?

- Connect strategy to execution
- Decentralize decision-making
- Make value flow without interruptions
- Lean Portfolio Management

1 out of 1

### Feedback 30 of 45

Which of the following aspects of the continuous delivery pipeline focuses on understanding customer needs?

- Continuous Exploration
- Continuous Integration
- Release on Demand
- Continuous Deployment

1 out of 1

### Feedback 31 of 45

Which of the following activities occurs during the Inspect and Adapt workshop?

- Planning the next PI
- A demo of the integrated system
- A retrospective of the Iteration
- Refining the ART backlog

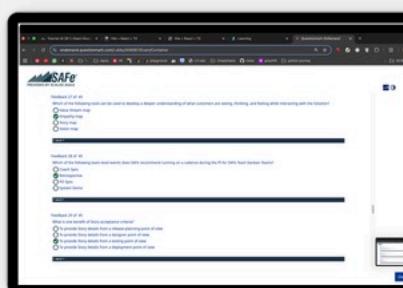

1 out of 1

### Feedback 32 of 45

Team B has elected to stop holding retrospective events so they can spend more time completing Stories. Which of the following Agile Team responsibilities is Team B over-prioritizing?

- Plan the work
- Connect with the customer
- Deliver value
- Apply systems thinking

1 out of 1

Close ✕

### Feedback 27 of 45

Which of the following tools can be used to develop a deeper understanding of what customers are seeing, thinking, and feeling while interacting with the Solution?

- Value Stream map
- Empathy map
- Story map
- Vision map

1 out of 1

### Feedback 28 of 45

Which of the following team-level events does SAFe recommend running on a cadence during the PI for SAFe Team Kanban Teams?

- Coach Sync
- Retrospective
- PO Sync
- System Demo

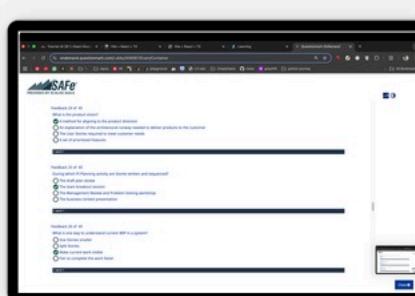

1 out of 1

### Feedback 29 of 45

What is one benefit of Story acceptance criteria?

- To provide Story details from a release-planning point of view
- To provide Story details from a designer point of view
- To provide Story details from a testing point of view
- To provide Story details from a deployment point of view

1 out of 1

AAA

### Feedback 24 of 45

What is the product vision?

- A method for aligning to the product direction
- An explanation of the architectural runway needed to deliver products to the customer
- The User Stories required to meet customer needs
- A set of prioritized Features

1 out of 1

### Feedback 25 of 45

During which PI Planning activity are Stories written and sequenced?

- The draft plan review
- The team breakout session
- The Management Review and Problem-Solving workshop
- The business context presentation

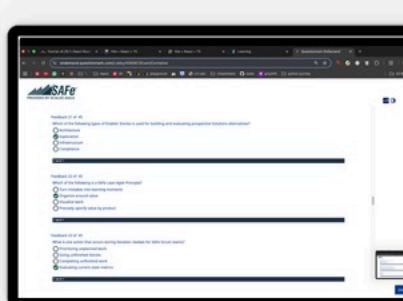

1 out of 1

### Feedback 26 of 45

What is one way to understand current WIP in a system?

- Size Stories smaller
- Split Stories
- Make current work visible
- Pair to complete the work faster

Close ✕

### Feedback 21 of 45

Which of the following types of Enabler Stories is used for building and evaluating prospective Solutions alternatives?

- Architecture
- Exploration
- Infrastructure
- Compliance

1 out of 1

### Feedback 22 of 45

Which of the following is a SAFe Lean-Agile Principle?

- Turn mistakes into learning moments
- Organize around value
- Visualize work
- Precisely specify value by product

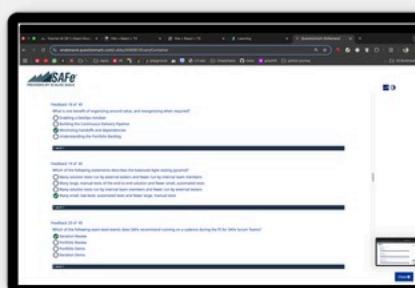

1 out of 1

### Feedback 23 of 45

What is one action that occurs during Iteration reviews for SAFe Scrum teams?

- Prioritizing unplanned work
- Sizing unfinished Stories
- Completing unfinished work
- Evaluating current state metrics

1 out of 1

Close ✕

### Feedback 18 of 45

What is one benefit of organizing around value, and reorganizing when required?

- Enabling a DevOps mindset
- Building the Continuous Delivery Pipeline
- Minimizing handoffs and dependencies
- Understanding the Portfolio Backlog

1 out of 1

### Feedback 19 of 45

Which of the following statements describes the balanced Agile testing pyramid?

- Many solution tests run by external testers and fewer run by internal team members
- Many large, manual tests of the end-to-end solution and fewer small, automated tests
- Many solution tests run by internal team members and fewer run by external testers
- Many small, low-level, automated tests and fewer large, manual tests

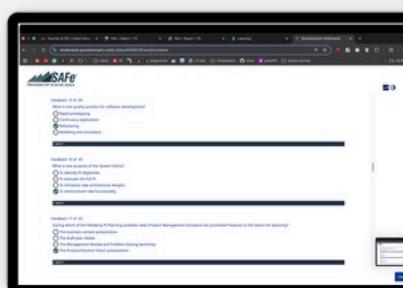

1 out of 1

### Feedback 20 of 45

Which of the following team-level events does SAFe recommend running on a cadence during the PI for SAFe Scrum Teams?

- Iteration Review
- Portfolio Review
- Portfolio Demo
- Iteration Demo

1 out of 1

### Feedback 15 of 45

What is one quality practice for software development?

- Rapid prototyping
- Continuous exploration
- Refactoring
- Modeling and simulation

1 out of 1

### Feedback 16 of 45

What is one purpose of the System Demo?

- To identify PI Objectives
- To evaluate the full PI
- To introduce new architectural designs
- To demonstrate new functionality

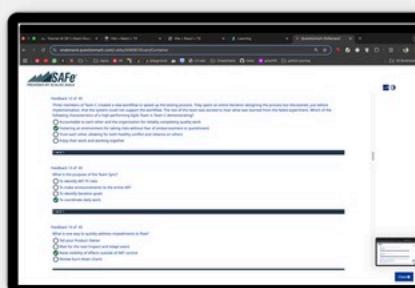

1 out of 1

### Feedback 17 of 45

During which of the following PI Planning activities does Product Management introduce the prioritized Features to the teams for planning?

- The business context presentation
- The draft plan review
- The Management Review and Problem-Solving workshop
- The Product/Solution Vision presentation

### Feedback 12 of 45

Three members of Team C created a new workflow to speed up the testing process. They spent an entire Iteration designing the process but discovered, just before implementation, that the system could not support the workflow. The rest of the team was excited to hear what was learned from the failed experiment. Which of the following characteristics of a high-performing Agile Team is Team C demonstrating?

- Accountable to each other and the organization for reliably completing quality work
- Fostering an environment for taking risks without fear of embarrassment or punishment
- Trust each other, allowing for both healthy conflict and reliance on others
- Enjoy their work and working together

1 out of 1

### Feedback 13 of 45

What is the purpose of the Team Sync?

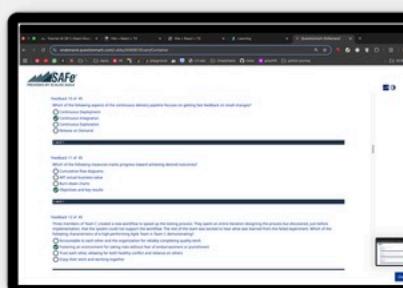

- To identify ART PI risks
- To make announcements to the entire ART
- To identify Iteration goals
- To coordinate daily work

1 out of 1

### Feedback 14 of 45

What is one way to quickly address impediments to flow?

- Tell your Product Owner
- Wait for the next Inspect and Adapt event
- Raise visibility of effects outside of ART control
- Review burn-down charts

Close ✕

### Feedback 10 of 45

Which of the following aspects of the continuous delivery pipeline focuses on getting fast feedback on small changes?

- Continuous Deployment
- Continuous Integration
- Continuous Exploration
- Release on Demand

1 out of 1

### Feedback 11 of 45

Which of the following measures tracks progress toward achieving desired outcomes?

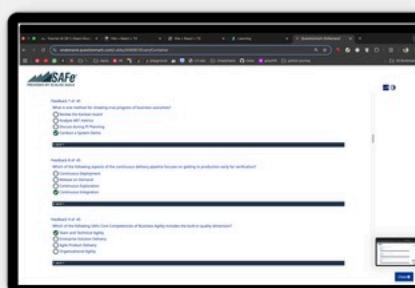

- Cumulative flow diagrams
- ART actual business value
- Burn-down charts
- Objectives and key results

1 out of 1

BLOCK 3: Questions

### Feedback 1 of 45

What is the typical timebox in which to complete a User Story?

- One Iteration
- One month
- One PI
- One year

1 out of 1

### Feedback 2 of 45

During which PI Planning activity do Business Owners assign business value to PI Objectives?

- The draft plan review
- The ART confidence vote
- The Management Review and Problem-Solving workshop
- The team breakout session

1 out of 1

### Feedback 3 of 45

What is the primary purpose of the ART Planning Board?

- To show dependencies between teams relating to the Feature development
- To satisfy System Demo expectations by demonstrating incremental delivery
- To show Feature priority in association with business value
- To show sizing of the Epics in relation to each other
